

## Set of coursing pulleys - model 2022

(price list valid from December 1, 2021, price change reserved)

### Packaging of pulleys

Branded case for heavy duty, manufacturer Manutan, dimensions h x w x d: 206 x 428 x 524 mm. It has a complete black foam lining, 4 locks, one fuse, high load capacity, waterproof. I don't deliver pulleys without a suitcase, I am a proponent of professionalism.

### Pulley's description

The pulleys are indestructible. We managed to cross the pulley with a chopper and the pulley, except for a groove on the bottom, remained intact, only bent the steel 12mm tip. The tractor was of course KO.

Only bearings have a limited service life, depending on the frequency and operating conditions. They are water resistant, but not waterproof.

Whole pulleys are made of 3 pieces of hard duralumin for machining, the lower and upper static parts are coated with black matte, anodized.

The upper part is fitted with a rubber ring that is able to absorb eventual impact. Others, nuts, bolt, spacer tube, washers are stainless steel or galvanically modified FE.

I have been developing the entire system for 8 years and previous models are in many EU countries and serve without problems.

### Fixing spikes

The tips are steel, galvanically modified, optional lengths 35cm, placement of tips is recommended to drill AKU with a drill.

The tips and accessories are in 3 plastic containers that are part of the case. The pulleys must not be hammered, they are only pushed.

### Other free accessories

1x vidium drill 8mm, length 400mm; 1x combination wrench 19mm; 2x hexagonal; 1x bolt M12 hex; 2x M6 screw, 2x 8mm large washers, 1x 12mm thin washer, 1x 12mm washer, 1x M12 extension nut, 1x M12 ordinary nut, 1x bearing, 1x stainless steel spacer tube, 1x micro cloth, **!!!12x spare rubber ring !!!**
